

K-Drama Bot Command Guide

Readable command reference for the current bot code. Admin commands work only for configured admins in private chat.

In examples, replace showname with the real show name. Hindi/K-Hindi uses the base command with no category suffix, for example `/delete showname 1 1 480p`.

1. Category Command Names

Hindi / K-Hindi:

base commands:

`/delete`

`/add`

`/add_poster`

other explicit Hindi commands:

`/delete_hindi`

`/add_hindi`

`/add_poster_hindi`

`/import_hindi`

Other categories:

K-Original -> `_orig`

Japanese Drama -> `_jap`

CT Drama/C Drama -> `_c`

Global -> `_glb`

Pakistan -> `_pak`

Anime -> `_anime`

2. Delete Commands

Use `/delete` for Hindi. For other categories, replace `/delete_category` with `/delete_orig`, `/delete_jap`, `/delete_c`, `/delete_glb`, `/delete_pak`, or `/delete_anime`.

Normal numeric season format:

Hindi:

`/delete showname`

`/delete showname 1`

`/delete showname 1 1`

`/delete showname 1 1 480p`

`/delete showname 1 1 720p`

`/delete showname 1 1 1080p`

`/delete showname 1 1 4k`

Other category pattern:

`/delete_category showname`

`/delete_category showname 1`

`/delete_category showname 1 1`

`/delete_category showname 1 1 480p`

```
/delete_category showname 1 1 720p
/delete_category showname 1 1 1080p
/delete_category showname 1 1 4k
```

S-season format. Use this when the show name ends with a number, like go go squid 2.

Hindi:

```
/delete showname S1
/delete showname S1 1
/delete showname S1 1 480p
/delete showname S1 1 720p
/delete showname S1 1 1080p
/delete showname S1 1 4k
```

Other category pattern:

```
/delete_category showname S1
/delete_category showname S1 1
/delete_category showname S1 1 480p
/delete_category showname S1 1 720p
/delete_category showname S1 1 1080p
/delete_category showname S1 1 4k
```

Exact category examples:

```
/delete_orig showname 1 1 480p
/delete_jap showname 1 1 480p
/delete_c showname 1 1 480p
/delete_glb showname 1 1 480p
/delete_pak showname 1 1 480p
/delete_anime showname 1 1 480p

/delete_orig showname S1 1 480p
/delete_jap showname S1 1 480p
/delete_c showname S1 1 480p
/delete_glb showname S1 1 480p
/delete_pak showname S1 1 480p
/delete_anime showname S1 1 480p
```

Example with show name ending in a number: /delete_c go go squid 2 deletes the full show named go go squid 2. To delete season/episode/quality from that show, use /delete_c go go squid 2 S1 1 720p.

3. Add Show / Add Season Commands

Hindi:

```
/add showname  
/add showname 1
```

Specific categories:

```
/add_hindi showname  
/add_orig showname  
/add_jap showname  
/add_c showname  
/add_glb showname  
/add_pak showname  
/add_anime showname
```

Add season in specific category:

```
/add_c showname 1  
/add_jap showname 1  
/add_orig showname 1
```

Inline category form:

```
/add showname > c  
/add showname > c 1  
/add showname > japanese  
/add showname > global 1  
/add showname > anime 1
```

Accepted inline category words include hindi, hindi_dubbed, hindi_dub, regional, orig, cdrama, c, arabic, glb, global, japanese, jap, pakistan, pak, anime.

4. Import Episode Commands

First send the import command. Then send the video, document, or http/https link.

Import commands:

```
/import_hindi  
/import_orig  
/import_jap  
/import_c  
/import_glb  
/import_pak  
/import_anime
```

Basic format:

```
/import_category showname S1 E1 480p  
/import_category showname S1 E1 720p  
/import_category showname S1 E1 1080p
```

Quoted show name:

```
/import_category "show name" S1 E1 720p
```

Split parts:

```
/import_category showname S1 E1 720p P1  
/import_category showname S1 E1 720p P2  
/import_category showname S1 E1 720p P3
```

Examples:

```
/import_c go go squid 2 S1 E1 720p  
/import_c "go go squid 2" S1 E1 720p  
/import_jap showname S2 E5 1080p P1
```

5. Poster Commands

Send the command first, then send a photo or image file.

Hindi:

```
/add_poster showname  
/add_poster_hindi showname
```

Other categories:

```
/add_poster_orig showname  
/add_poster_jap showname  
/add_poster_c showname  
/add_poster_glb showname  
/add_poster_pak showname  
/add_poster_anime showname
```

6. User Commands

```
/start  
/start support  
/start category__show_slug  
/help  
/search showname  
/favorites  
/recent_updates  
/request drama name  
/history  
/report  
/trending  
/top10  
/popular  
/fav
```

Deep links like /start category__show_slug are usually generated by bot buttons, favorites, search results, or inline results.

7. Admin Utility Commands

```
/stats  
/selftest  
/sync_users  
/banned_list
```

Broadcast:

```
/broadcast message text  
or reply to any message with:  
/broadcast
```

Sticker setting:

```
reply to a sticker with:  
/set_sticker
```

Unban:

```
/unban user_id  
/unban @username  
/unban full name
```

Lookup:

```
/get slug_or_hash
```

User search:

```
/user_search user_id  
/user_search @username  
/user_search full name
```

Report search:

```
/report_search showname
```

```
/report_search user_id
```

8. Quick Most-Used Examples

Delete Hindi episode quality:

```
/delete showname 1 1 720p
```

```
/delete showname S1 1 720p
```

Delete CT Drama episode quality:

```
/delete_c showname 1 1 720p
```

```
/delete_c showname S1 1 720p
```

Delete from show ending with number:

```
/delete_c go go squid 2 S1 1 720p
```

Add CT Drama show:

```
/add_c go go squid 2
```

Import CT Drama episode:

```
/import_c go go squid 2 S1 E1 720p
```

Add CT Drama poster:

```
/add_poster_c go go squid 2
```
